We design and create custom web-based applications for companies looking to grow, innovate, automate and serve their customers better

Cooperation Offered

1. Technical co-operation

Cooperation Requested

1. Sales / Distribution

Offer & Request

Duplicate Invoice Detection SoftwareSol

Employment Duration5 mos

We have developed a unique neural network algorithm and web portal helping companies detect duplicate payments due to high volume of supplier invoices, computing errors and workflows issues. The system can also detect frauds and anomalies from supplier invoices, allowing better control expenditure, fraud defense and increase profitability for your enterprise.

Cooperation Offered

1. License agreement

Cooperation Requested

1. Sales / Distribution
